## DETAILED ACTION

### *Allowable Subject Matter*

1. The indicated allowability of claims 8-9 are withdrawn in view of the newly discovered reference(s) to Spear et al. (5,615,903). Rejections based on the newly cited reference(s) follow.

### *Claim Objections*

2. Claim 8 is objected to because of the following informalities: "a panel" in line 19 should be changed to -- the panel --. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. **Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Spear et al. (5,615,903).**

Spear et al. in figures 1-3, disclose a cart having a structure that can be used to collect roofing debris comprising an open top container formed generally in the shape of an inverted, truncated pyramid having its lower, smaller base closed and its upper, larger base open and having end walls joined to inner and outer walls which are sloped,

relative to the vertical, at pre-determined angles. Spear et al. also disclose a horizontally arranged support frame (as shown in figure 1) located beneath and secured to the smaller base for supporting the container. Spear et al. also disclose support wheels (49) rotateably connected to, and depending beneath the frame for engagement with the ground upon which the cart is supported. The cart with the angle of the inner wall of the container being substantially the same as an angle selected for leaning a large panel against the wall of a house at a location between the container and the house wall so that the panel is adapted to be arranged close to the container for directing debris dropped down upon the panel into the container. Spear et al. further disclose a channel forming socket (10) on the upper portion that can be used to receive the lower edge of the panel which is leaned against the house wall.

#### ***Allowable Subject Matter***

5. Claim 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yemini discloses a wheel barrow.
